

# PRESS RELEASE

Alles einfach.

Einfach alles.

*Korntal-Münchingen, 11 October 2010*

Central website and new products

## **greenteQ.info – everything you need to know in one place**

**With more than 1,800 articles, the greenteQ product range of VBH has grown to an impressive size. The new *www.greenteQ.info* Internet site therefore offers all the information about the individual products as of now. In designing the Internet site, VBH attached considerable importance to a clear layout – despite the high information volume. The important thing is that everyone can find the information he requires, quickly and easily.**

With seven clearly structured product groups and 32 article groups, *greenteQ.info* represents a comprehensive information and service portal for existing and potential customers. Here they can find all the information as well as test certificates, product data sheets, assembly manuals and technical instructions to download. The new platform also provides pictures, technical data and the article number for each and every article. The product range is subdivided into the following categories: Window and door hardware, Chemicals, Profiles and Sealants, Elements, Fastening Technology and Tools.

All country-specific products such as the 1K winter gun foam from building material class B3, have been incorporated into the new greenteQ-homepage. Giving the site an international character was important to VBH: all information is therefore available in German, English and Russian and the safety data sheets are available in as many as 23 languages. In the long term, the entire site is to be available in all 23 languages of the countries in which VBH is present. In Germany, the sales share of the brand has already reached 5% 16 months after its launch.

### **New: sash seals and sash upstand seals for wooden windows and doors**

The article range on *greenteQ.info* is always up to date. For example, three new articles for wooden windows and doors have been added to the Seals area: the greenteQ sash seal 12 TPE, the greenteQ sash upstand seal 3 TPE and the greenteQ front door seal TPE-V. These are made from a thermoplastic elastomeric and highly networked EPDM-X + PP are easy to attach and have very good weather and ozone resistance, with a ten-year UV stability guarantee. The greenteQ sash seal 12 TPE and sash upstand seal 3 TPE have also been CE tested, and are available on the *www.ce-fix.de* homepage for configuring window and door designs. In addition, the seals have low closing
